### EXECUTIVE SUMMARY

Enterprise-oriented **Software Support Engineer** with **3+ years of experience** providing mission-critical Tier-2/Tier-3 application support, database engineering, and system administration. Proven track record of delivering **99.8% SLA compliance** across **500+ resolved technical incidents** for Fortune 500 multinationals, retail conglomerates, and digital banking platforms. Adept at deep-dive SQL query optimization, biometric attendance sync, HRMS & ERP payroll integrations, root cause analysis (RCA), and incident lifecycle mitigation.

### PROFESSIONAL EXPERIENCE

Software Support Engineer

2023 - Present

#### Enterprise Application & Tech Services

- Delivered dedicated L2/L3 production support for enterprise HRMS and ERP platforms, maintaining an overall **99.8% SLA compliance rate** across 500+ critical incidents.
- Analyzed and tuned backend SQL queries, indexing strategies, and execution plans, reducing database transaction latency by up to **40%**.
- Investigated backend anomalies in complex payroll calculations, shift attendance sync, and biometric logs using SQL profiling and system trace logs.
- Partnered with core product engineering and QA to reproduce application defects, verify hotfixes, and document detailed Root Cause Analysis (RCA) findings.
- Formulated client onboarding workflows and technical resolution knowledgebases, reducing recurring support inquiries by **30%**.

Technical Support & System Administrator

2021 - 2023

#### IT Solutions & Business Systems

- Administered enterprise Windows Server and Linux hosts, Active Directory credentials, group policies, and network security protocols for 200+ users.
- Configured automated SQL database backup schedules and validated zero-data-loss disaster recovery protocols with 100% data recoverability.
- Monitored CPU, memory utilization, and network traffic thresholds, proactively averting infrastructure downtime and bottlenecks.
- Executed data validation and schema integrity checks during multi-site ERP migration rollouts.

## ENTERPRISE CLIENT ACCOUNTS SUPPORTED

Delivered mission-critical software support, HRMS/ERP integrations, and database operations for premier enterprise accounts:

✓ DHL (Logistics)

✓ Nestlé (Global FMCG)

✓ Qatar Steel (Industrial)

✓ Nextcare (Health TPA)

✓ Dabur (FMCG)

✓ Al Maryah Bank (Banking)

✓ DFS Group - LVMH (Retail)

✓ Tiffany & Co. (Luxury)

✓ Accor Hotels (Hospitality)

✓ NAS Neuron (Health TPA)

## TECHNICAL SKILLS MATRIX

### Database Management

Microsoft SQL Server, MySQL, T-SQL, Query Tuning, Index Optimization, Execution Plans, Stored Procedures, Backups & Recovery.

### Enterprise Applications

HRMS Platforms, ERP Business Suites, Shift Management, Payroll Calculation Engines, Biometric Integration, POS Sync.

### System Administration

Windows Server (2016-2022), Linux (RHEL, CentOS), Active Directory, Group Policy, IIS, DNS/DHCP, Infrastructure Monitoring.

### Support & Operations

L2/L3 Production Support, Root Cause Analysis (RCA), SLA Compliance, Jira, ServiceNow, Incident Escalation, API Diagnostics.

## EDUCATION

### Computer Science & Information Technology

Undergraduate Degree / Diploma in Computing & Systems

## CERTIFICATIONS & TRAINING

### Enterprise SQL & System Administration

Database Optimization, ITIL Support Practices, Network Fundamentals
